

HOMES 252

Understanding the LEED for Homes Rating System

WHEN & WHERE

November 7, 2011 8:30 am - 5:00 pm
71 Garfield, Detroit, MI

HOSTED BY

In today's business, LEED is the language of green. Make your next project a LEED for Homes project. Learn the intents and requirements of prerequisites and key credits within the LEED for Homes rating system. Identify the roles and responsibilities of key stakeholders, learn the value of green homes, and prepare for key considerations in the LEED® for Homes certification process.

OBJECTIVES For the LEED for Homes Rating System:

- ✓ Identify the types of projects which are eligible.
- ✓ Recognize the roles and responsibilities of key stakeholders in the LEED certification process.
- ✓ Recognize goals, intents, and requirements of prerequisites and key credits, and strategies to meet them.
- ✓ Identify synergies between LEED credits.
- ✓ Plan for key considerations and requirements for the LEED certification process.
